

# Practical-5

## Deployment of ML project using Flask.

**Task 1:** Install the required libraries

```
pip install Flask
```

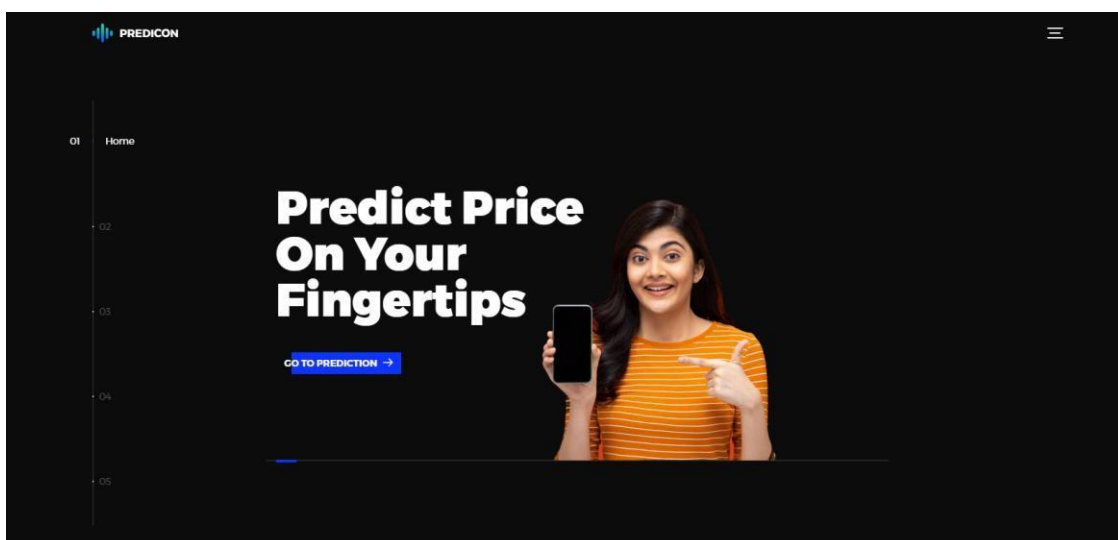

**Task 2:** Follow the steps described in theory material to deploy the model using Flask. Run the flask application to execute the deployed model.

**Step :1 Create Templates**

Name	Type	Size
static	File folder	
templates	File folder	
app_final.py	Python Source File	5 KB

car.html	Chrome HTML Do...	29 KB
cpp.html	Chrome HTML Do...	8 KB
index.html	Chrome HTML Do...	15 KB
information.html	Chrome HTML Do...	7 KB
lap.html	Chrome HTML Do...	33 KB
lpp.html	Chrome HTML Do...	10 KB
README.md	Markdown Source ...	1 KB
style.css	CSS Source File	21 KB
style.css.map	Linker Address Map	11 KB

**User Interface :**

## Car Price Prediction

Company Name

Hyundai

Model

Transmission Type

Automatic

Year Of Purchase

2021

Fuel type

Petrol

Kms Travelled

Enter No of kms Driven

Predict Price

ISUZU

HONDA

**Step: 2** Import the Model, Dataset, and Scalar objects into the project folder.

Datasets	30-06-2023 06:57 PM	File folder
Group Members	30-12-2022 07:43 PM	File folder
Laptop_Price_Prediction	07-05-2023 06:36 AM	File folder
model	30-12-2022 08:13 PM	File folder
PPT	27-12-2022 02:54 PM	File folder
README	01-07-2023 07:21 PM	File folder
Report	02-05-2023 12:48 PM	File folder
UI	28-06-2023 02:38 PM	File folder

**Step: 3** Create the app.py file to serve the deployment

```

app_final.py X
D: > Capstone Project-1 > UI > New UI > app_final.py > ...
You, 5 months ago | 1 author (You)
1 from flask import Flask , render_template,request,url_for
2 from flask cors import CORS,cross_origin
3 import pandas as pd
4 import numpy as np
5 import pickle
6
7 app = Flask(__name__)
8 cors=CORS(app)
9 model1=pickle.load(open("D:\Capstone Project-1\Car Price Prediction\LinearRegressionModel.pkl",'rb'))
10 pipe = pickle.load(open('D:\Capstone Project-1\Laptop_Price_Prediction\pipe.pkl','rb'))
11 # df = pickle.load(open('df.pkl','rb'))
12 # model1= 'LinearRegressionModel.pkl'
13 car=pd.read_csv("D:\Capstone Project-1\Car Price Prediction\cardekho_updated.csv")
14 # df=pd.read_csv("D:\Capstone Project-1\Laptop_Price_Prediction\laptop_data_final.csv")
15 df=pd.read_csv("D:\Capstone Project-1\Laptop_Price_Prediction\lappy.csv")

    fuel_type=car['fuel_type'].unique()
    km_driven=(request.form.get('km_driven'))

    return
render_template('car.html',companies=companies,car_models=car_models,transmission_type=trans
mission_type, year=year, fuel_type=fuel_type,km_driven=km_driven)

if __name__=="__main__":
    app.run(debug=True)
```

## Output :

## Car Price Prediction

Company Name

Maruti

Model

Maruti A Star

Transmission Type

Manual

Year Of Purchase

2011

Fuel type

Petrol

Kms Travelled

80000

Predict Price

Predicted Price : ₹76396.28

ISUZU

HONDA
